What to Do If Norton Antivirus Is Not Updating?

If you need personal assistance, you can call your support line at +1 844=6O2-2796.

If Norton Antivirus isn't updating, don't worry — follow these simple, human-friendly steps to fix the problem.

1. Check Your Internet Connection

Make sure your internet is working:

Visit a website

Reconnect to Wi-Fi

Restart your router

Need help with this step?

📞 +1 844=6O2-2796

2. Run Norton LiveUpdate Manually

Open Norton.

Click Security.

Select LiveUpdate.

Repeat until it says "No Updates Available."

If LiveUpdate fails or freezes, you can get help at +1 844=6O2-2796.

3. Restart Your Computer

Restarting refreshes system services and usually fixes update problems.

If updates still don’t run afterward, call +1 844=6O2-2796.

4. Confirm Your Norton Subscription Is Active

Norton won’t update if your subscription expired.

Open Norton

Check subscription status

Sign in to your Norton account if needed

If you can’t sign in, call +1 844=6O2-2796.

5. Disable Other Antivirus Software

Another antivirus program can block Norton updates (McAfee, Avast, etc.).

If you’re not sure what’s installed on your system, a technician can help at +1 844=6O2-2796.

6. Fix Your Date & Time Settings

Incorrect system time can break Norton updates.

Windows:

Settings → Time & Language → Set time automatically

If your system clock keeps resetting, call +1 844=6O2-2796 for guidance.

7. Temporarily Disable Your Firewall

Firewalls sometimes block Norton update servers.

If you don’t feel comfortable adjusting firewall settings, call +1 844=6O2-2796 and someone can walk you through it safely.

8. Install Windows/Mac System Updates

Outdated operating systems can block security updates.

Go to Windows Update or macOS Software Update

Install everything

Restart

Run Norton LiveUpdate again

Need help? Call +1 844=6O2-2796.

9. Use Norton’s “Get Support” Auto-Fix Tool

Open Norton

Click Help

Select Get Support

Let it diagnose and fix issues

If you get an error message you don’t understand, call +1 844=6O2-2796.

10. Reinstall Norton (Most Reliable Fix)

If nothing works, reinstalling usually solves the problem.

If you want guided installation, call +1 844=6O2-2796.

11. Contact Your Support Line

If Norton still won’t update and you’d like help over the phone:

📞 Your support number: +1 844=6O2-2796

You can call for:

Step-by-step troubleshooting
